

High professional Vegan Cosmetics for Pets

Pamper your pet and take care of it to prevent it from fleas, ticks, mites, lice and mosquitoes.

At Petuxe we care about the health and well-being of pets. For this reason, we have formulated a new preventive treatment consisting of: shampoo and spray.

Both the **shampoo and the spray** have been formulated with tea tree oil and quassia vinegar, these ingredients are ideal for preventing and moisturizing the coat.

Regarding the application method, we recommend washing the dog's coat with the preventive shampoo and rinsing. Once this process is finished, the spray is applied to the wet mantle without the need to rinse. The usual drying process will be carried out, it can be left to dry at room temperature.

We recommend using this treatment every time you want to wash the dog's coat, especially when you want to protect pets from fleas, mites and any insect.

All the formulas of our dog shampoos and products are vegan.

At Petuxe we take care of our pets and we take care of the planet with our high vegan

cosmetic products.
